

COLLEGE OF HEALTH, EDUCATION, AND SOCIAL TRANSFORMATION

Student Research and Practicum Scholarships

Support students in their final semesters of college as they conduct experiential learning, research, and community outreach apprenticeships.

Practicum Supervisors and Cooperating Teacher Stipends

As our Teacher Education programs continue to grow, our need for practicum supervisors and cooperating teachers grows. Support these efforts by establishing funds to provide additional stipends to our faculty who go above and beyond their day to day work.

Papen Aprendamos Autism Diagnostic Center

Sustainable support to increase staff capacity, enhance operations, and shorten the current waiting time for families in the community, which is currently 18 months. We are one of only two diagnostic centers in the state of New Mexico.

Endowed Professorships and Chairs

Support the increasing need for faculty as programs across the College of HEST grow in enrollment.

Naming Opportunities

Naming a school, space, or department is a powerful way to create a lasting legacy, ensuring your name is woven into the fabric of the institution for generations to come.

Gifts can be designated as current-use funds, making an immediate impact, or as an endowment, providing ongoing support year after year. Whether you choose to fund scholarships, enhance programs, or invest in innovative initiatives, your contribution will reflect your values and vision while making a meaningful difference.

Naming Opportunities:

- School of Borderland and Ethnic Studies
- School of Communication Disorders
- School of Counseling and Educational Psychology
 - CEP Clinic
- School of Kinesiology
 - Biomechanics Lab
- School of Nursing
